

MENAGERIE

Maneuver your flea through the deadly spider swamp...onto the mystical wall for a brief rest...quickly blast a ride on one of the traveling menagerie of animals for the final dash through the forest.

KEYBOARD OR JOYSTICK

VIC-1926

INSTRUCTIONS FOR USE

MENAGERIE

Loading the Cartridge and Starting the Game.

1. Turn your VIC-20 OFF before inserting or removing the cartridge.
2. Insert the cartridge (label side up) into the wide expansion port on the back of the computer.
3. Turn the VIC-20 ON. After a second or two, the opening title should appear on the screen. (If the title doesn't appear, turn your VIC-20 off then back on).

Adjusting Screen Position

To center the picture use the  and  keys. Each time you press the  key, the picture will move to the right, and when the  key is pressed, the picture will move towards the bottom of your TV screen. Keep using these two keys until you are satisfied the picture is centered within your screen. (NOTE: Once the game has begun you can not change the screen colors).

Eliminating Screen Flutter

On some TV sets with automatic fine tuning your screen may "flutter" up and down when using a computer or video game. To correct this, hold down the  key and hit the  key. (NOTE: Doing this with a standard TV set may cause the screen to flutter).

STRATEGY

Move the BUG through the spider field, without being eaten, pause on the garden wall which is slowly being consumed by an unseen, mystical energy force. Hitch a ride on the travelling menagerie of animals to finally score at the top of the screen.

The game is designed with 3 initial BUGS — upon consecutive scoring, you can add additional playing BUGS. Scoring targets are constantly moving and shifting their values.

Up to 10 difficulty levels . . . when a BUG is "eaten" by a spider or he fails to jump at the right time onto the back of the ever faster travelling menagerie pack, he dies. There are three BUGS to each level . . . by successfully surviving each 3 BUGS, a replacement BUG is awarded.

CONTROLS

Menagerie can be played with either the joystick or keyboard.

Using the keyboard . . .

J Key.....	Right Movement
K Key	Left Movement
